INDEX

Aetiology of constrictive pericarditis, with special reference to tuberculous pericarditis, together with a note on polyserositis, 291; constrictive pericarditis, 291; acute tuberculous pericarditis, 300; acute septic pericarditis, 314; acute idiopathic pericarditis, 315; cause of constrictive pericarditis, 315; polyserositis, 317.
Agranulocytosis, chronic, experimental observations on, 165.
Anaemia, haemolytic, chronic, with haemoglobinuria (the Marchiafava-Micheli syndrome), 1.
Anomalies of intestinal absorption of fat: II. The haematology of idiopathic steatorrhoea, 9.
Antihistamine drugs, review of, 271; pharmacology of, 274; experimental studies with, in man, 278; mode of administration, dosage, and side effects, 280; therapeutic applications, 283.
Arsenical dermatitis, treatment of, with dimercaptopropanol (BAL), 49.

Calciferol, toxic effects of, 203; administration of, in high dosage, 206; incidence of toxic symptoms, 223; pathological effects of calciferol intoxication, 224.
Case of chronic porphyria associated with recurrent jaundice, 123; porphyrin determinations, 127; special chemical examinations: of the urine, 128; of the faeces, 131; of blood, 131.
Chronic haemolytic anaemia with haemoglobinuria (the Marchiafava-Micheli syndrome), 1.

Dermatitis, arsenical, treatment of, with dimercaptopropanol (BAL), 49.
Dimercaptopropanol (BAL), treatment of arsenical dermatitis with, 49.
Does sodium salicylate cure rheumatic fever, 139.
Drugs, antihistamine, review of, 271; pharmacology of, 274; experimental studies with, in man, 278; mode of administration, dosage, and side effects, 280; therapeutic applications, 283.

Eosinophilosis, pulmonary, 257.
Experimental observations on chronic agranulocytosis, 165.

Factors influencing plasma concentrations of salicylate, 229.
Fat, intestinal absorption of, anomalies of: II. The haematology of idiopathic steatorrhoea, 9.

Haematology of idiopathic steatorrhoea, 9.
Haemochromatosis, observations on the incidence and on the value of liver biopsy in diagnosis of, 247.
Haemoglobinuria, chronic haemolytic anaemia with (the Marchiafava-Micheli syndrome), 1.
Haemolytic anaemia, chronic, with haemoglobinuria (the Marchiafava-Micheli syndrome), 1.
Haemosiderosis, pulmonary, idiopathic (essential brown induration of the lungs), 25.
Hypertension, relationship of, to periarteritis nodosa, 200.
— severe, in young persons, a study of fifty cases, 83; classification of cases, 83; age incidence of, 85; causes of hypertension in younger persons, 86.

Idiopathic pericarditis, acute, 315.
— pulmonary haemosiderosis (essential brown induration of the lungs), 25.
— steatorrhoea, haematology of, 9.
Intestinal absorption of fat, anomalies of: II. The haematology of idiopathic steatorrhoea, 9.

Jaundice, chronic, remarks regarding, 81.
— recurrent, a case of chronic porphyria associated with, 123; porphyrin determinations, 127; special chemical examinations: of the urine, 128; of the faeces, 131; of blood, 131.

Kidney in periarteritis nodosa, 175.

Liver biopsy, value of, observations on the incidence and on the, in diagnosis of haemochromatosis, 247.
Lungs, essential brown induration of, 25.

Marchiafava-Micheli syndrome, 1.

Periarteritis nodosa, kidney in, 175; relationship of hypertension to, 200.
Pericarditis, constrictive, aetiology of, with special reference to tuberculous pericarditis together with a note on polyserositis, 291.
— idiopathic, acute, 315.
— septic, acute, 314.
— tuberculous, aetiology of constrictive pericarditis, with special reference to, 291.
Plasma concentration of salicylate, relationship between, and its toxic effects, 154; factors influencing, 229.
Polyserositis, aetiology of constrictive pericarditis, with special reference to tuberculous pericarditis, together with a note on, 291.
Porphyria, chronic, a case of, associated with recurrent jaundice, 123; porphyrin determinations, 127; special chemical examinations: of the urine, 128; of the faeces, 131; of blood, 131.
Proceedings of the Association of Physicians of Great Britain and Ireland, 1948: Forty-second Annual General Meeting, 323.
Pulmonary eosinophilosis, 257.
— haemosiderosis, idiopathic (essential brown induration of the lungs), 25.
Purpura, anaphylactoid, 95.

Remarks regarding chronic jaundice, 81.
Review of antihistamine drugs, 271; pharmacology of antihistamine drugs, 274; experimental studies with antihistamine drugs in man, 278; mode of administration, dosage, and side effects, 280; therapeutic applications, 283.
Rheumatic fever, does sodium salicylate cure, 139.

Schönlein-Henoch syndrome (anaphylactoid purpura), 95.
Severe hypertension in young persons, a study of fifty cases, 83; classification of cases, 83; age incidence of, 85; causes of hypertension in younger persons, 86.
Sodium salicylate, does it cure rheumatic fever, 139; relationship between plasma concentration of, and its toxic effects, 154; emetic action of, 157; hyperpnoeic action of, 158; factors influencing plasma concentrations of, 229.
— therapy, toxic manifestations of, 153; relationship between plasma concentration of salicylate and its toxic effects, 154; emetic action of salicylate, 157; hyperpnoeic action of salicylate, 158.
Steatorrhoea, idiopathic, haematology of, 9.

Toxic effects of calciferol, 203; administration of calciferol in high dosage, 206; incidence of toxic symptoms, 223; pathological effects of calciferol intoxication, 224.
— manifestations of sodium salicylate therapy, 153; relationship between plasma concentration of salicylate and its toxic effects, 154; emetic action of salicylate, 157; hyperpnoeic action of salicylate, 158.
Treatment of arsenical dermatitis with dimercaptopropanol (BAL), 49.
Tuberculous pericarditis, aetiology of constrictive pericarditis, with special reference to, 291.
